PLANT CARE

“protect” spray

Neem Oil is combined with a specialist microbial blend to protect plants from the environmental stressors that make them struggle.

How to use

Apply every fortnight or if your plant looks like it needs some extra love and care.

Step 1

Apply at night or in the morning. Shake well to evenly disperse the ingredients.

Step 2

Gently mist the top and underside of the leaves and stem. Our fine mist ensures even coverage.

Repeat every 2-3 weeks throughout the year, or more frequently when plants are struggling.
