

Whoflungdung is a biologically activated, nutrient rich, weed free, absorbent, super mulch. It's composted, inoculated with eNcase and filled with nutrients, so that when added to soil it introduces a wide diversity of beneficial bacteria. These beneficial bacteria readily proliferate through the soil, acting as a barrier/deterrent to pathogenic bacteria, providing a safe environment for healthy plant growth.

Additionally, Whoflungdung is sustainable - it is a recycled waste product, made up of straw and wood shavings screened from chicken

manure. In many instances Neutrog supplies the fertiliser that grows the crop from which the straw is sourced. Now that is sustainability.

Most significantly, Whoflungdung reduces, if not eliminates, the nitrogen draw-down which is often reflected in plants after mulch has been applied. Apart from reducing weeds, many users also happily report that blackbirds don't like it.

It is available in compressed 20kg bales from good hardware and garden supply shops.

**BIOLOGICALLY ACTIVATED,
NUTRIENT RICH, WEED FREE,
ABSORBENT, SUPER MULCH**

Directions for use

Apply a uniform layer of Whoflungdung at 25mm to 100mm deep to cover soil, leaving 50mm to 100mm gap around base of any plants, trees or shrubs.

**KNOWN
TO DETER
BLACKBIRDS**

**ELIMINATES
NITROGEN
DRAW-DOWN**
