Bringing life to earth

LocalSafe™

10L and 20L Module

Combining cutting-edge technology and scientific research with natural ingredients, Contact Organics delivers a breakthrough in effective environmentally friendly weed control. Contact Organics LocalSafe Weed Terminator is a natural herbicide formulated for high performance while LocalSafe Soil Conditioner improves soil quality. Our product is currently used by councils, schools, vineyards, orchards, landscapers, home users and a mix of others.

The Weed Terminator is a non-selective bio-herbicide made from acetic acid for the control of annual and perennial weeds. It is suited for use in most situations requiring weed control.

- ✓ Parks
- ✓ Verges
- ✓ Gardens
- ✓ Playgrounds
- ✓ School grounds
- ✓ Nurseries
- ✓ Spot spraying in lawns and turf
- ✓ Orchards
- ✓ Vineyards
- ✓ Other row crops
- ✓ Fence lines
- ✓ Bushland

How it works

The Weed Terminators patented delivery technology assists in penetrating the plant. The Weed Terminators are contact herbicides and kill the weeds by desiccation. The Soil Conditioner is a proprietary blend of natural oils and surfactants that improve water penetration of the soil. It also contains mineral nutrients, iodine and enhances soil health.

Sold in a 10L or 20L module, each module consists of equal amounts Weed Terminator Concentrate and Soil Conditioner, best results come from the equal dilution of the two parts.
